Ciudad Victoria, México

Dec 2025

CBTis 271

Technical Degree in Programming

GPA: 93/100

Ciudad Victoria, México

Jun 2022

Experience

ROCO Refrigeration & Home Appliances Repair Shop

Android Developer & UI/UX Designer

Ciudad Victoria, México

Jan 2026 - Apr 2026

- Independently designed and developed a native Android application that fully digitalized a technical service business's operations, replacing error-prone paper records.
- Centralized inventory, client management, work scheduling, spare parts, and financial tracking into a single platform using clean architecture patterns and dependency injection with Dagger Hilt.
- Implemented push notifications, contact import features, and filterable financial queries by period.
- *Tech stack:* Kotlin, Jetpack Compose, Dagger Hilt, Material 3 Expressive, Supabase.

Auditoría Superior del Estado de Tamaulipas

UI/UX Designer & Web Developer

Ciudad Victoria, México

Sep 2025 - Dec 2025

- Led the complete visual identity redesign of the website, standardizing and improving the color palette, component system, and content sections.
- Conducted user research and brainstorming sessions to define design direction, achieving a SUS score of 77.5 compared to 22.5 for the legacy system.
- Migrated the platform from WordPress to Laravel, developing frontend and backend simultaneously.
- Built a custom content editor from scratch featuring support for images, headlines, and rich text fields.
- Automated institutional document management and uploading, reducing process time by 70%.
- Developed an automated news publishing system based on scheduled dates.
- *Tech stack:* Laravel, PHP, HTML, JavaScript, CSS, Bootstrap, Figma.

Projects

Tacea Music — Website Redesign

GitHub

HTML, CSS, JavaScript, Figma

- Redesigned the visual identity and information architecture of a local music store website.
- Developed the frontend prototype with real-time filters, dynamic page generation per product and blog, and a web component system using vanilla JavaScript.
- Carried out the full process from user research and Figma prototyping to implementation.

MindLink — Classroom-style Educational Platform

GitHub

React, TailwindCSS, Node.js, JavaScript

- Developed a web platform that allows teachers to create classes, manage students, and grade submissions.
- Allowed students and teachers to upload and view course files.
- Implemented differentiated roles with distinct access flows for teachers and students.
- Architecture split into a React frontend and a Node.js backend.

Technical Skills

Mobile: Kotlin, Jetpack Compose, Dagger Hilt, Material 3.

Web Frontend: React, Astro, JavaScript, TypeScript, HTML, CSS, Tailwind CSS.

Backend: Laravel, PHP.

Databases: Supabase, Firebase, PostgreSQL, MySQL.

Design: Figma.

Tools: Git, GitHub, Bootstrap.

Soft Skills

- Effective communication with clients and multidisciplinary teams.
- Collaborative work in team environments.
- Oriented toward creative and high-impact solutions.
- Ability to manage and follow through on projects from start to finish.

Languages

Spanish: Native.

English: C1 Level - TOEFL ITP (Score: 640/677).
